

HUB University Presents:

2019 Employee Benefits Compliance Update

COMPLIANCE

Employer sponsored benefit plans have many ongoing compliance obligations. Knowing what needs to be done, how to do it and when it needs to be done are essential parts of maintaining compliant plans. Not meeting plan compliance obligations can lead to both penalties and fines from the regulatory agencies, and expose plans to participant lawsuits. In this session we'll discuss core plan compliance obligations under ERISA and the Affordable Care Act, and potential penalties plans may face when they aren't compliant.
